

## 8-4

# Surface Areas of Prisms and Pyramids

© CONTENT STANDARDS

6.G.4

### What You'll Learn

To use nets and to find the surface areas of prisms and pyramids

🔊 **New Vocabulary** net, surface area

### Why Learn This?

Package designers make creative labels. The surface area of an object is the space designers have to work with.

A **net** is a pattern you can fold to form a three-dimensional figure.

**EXAMPLE****Drawing a Net**

**1** Draw a net for the triangular prism at the left.

**Step 1** Draw one base.

**Step 2** Draw one face that connects the two bases.

**Step 3** Draw the other base.

**Step 4** Draw the remaining faces.

**Get ready to play the net game. How many can we get right in a row?**

**<http://illuminations.nctm.org/ActivityDetail.aspx?ID=84>**

The **surface area** of a three-dimensional figure is the sum of the areas of its surfaces.

### EXAMPLE Finding the Surface Area of a Prism

**2 Package Design** Find the surface area of the juice box at the left.

**Step 1** Draw and label a net for the prism.

**Step 2** Find and add the areas of all the rectangles.

Top	Back	Left	Front	Right	Bottom
$3 \times 6$	$+ 10 \times 6$	$+ 10 \times 3$	$+ 10 \times 6$	$+ 10 \times 3$	$+ 3 \times 6$
$= 18$	$+ 60$	$+ 30$	$+ 60$	$+ 30$	$+ 18$
$= 216$					

The surface area of the juice box is 216 square centimeters.

### Quick Check

**2.** Find the surface area of the prism.

**EXAMPLE****Finding the Surface Area of a Pyramid**

3 Find the surface area of the square pyramid at the left.

**Step 1** Draw and label a net for the pyramid.

**Step 2** Find and add the areas of the square and the triangles. Since the base is a square, the triangular faces are congruent.

Square	Triangle	Triangle	Triangle	Triangle
$25 \times 25$	$+ \frac{1}{2}(25 \times 20)$	$+ \frac{1}{2}(25 \times 20)$	$+ \frac{1}{2}(25 \times 20)$	$+ \frac{1}{2}(25 \times 20)$
$= 625$	$+ 250$	$+ 250$	$+ 250$	$+ 250$
$= 1,625$				

The surface area of the pyramid is 1,625 square inches.

**Quick Check**

3. Find the surface area of the square pyramid at the right.

*Table talk to answer these 3 questions.*

 **Check Your Understanding**

1. **Vocabulary** Describe how a net can help you find the surface area of an object.

**Find the surface area. A small cube measures 1 cm on a side.**

**Your assignment is a practice worksheet on surface area. We will begin it together.**

**Practice 8-4**

**Surface Areas of Prisms**

Draw a net for each three-dimensional figure.

10. Jan is making a pencil holder out of plastic canvas. The pencil holder will be 4 inches high. It will not have a top. Each edge of the square base is 3 inches long. How much plastic canvas does Jan need?
