THINGS TO LOOK FOR:

1. WHY ARE THE UNITS USED TO MEASURE VOLUME CALLED CUBIC UNITS?
2. HOW DOES KNOWING THE AREA OF THE BASE HELP YOU TO FIND THE VOLUME OF A PRISM?
3. HOW DO YOU KNOW THAT THE TWO FORMULAS, $V = B \cdot h$ AND $V = l \cdot w \cdot h$ WILL BOTH GIVE YOU THE VOLUME OF A SQUARE-BASED PRISM?

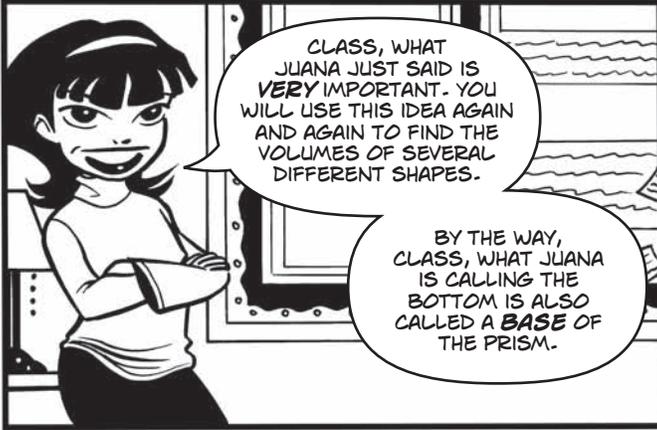

SO, THAT MEANS THAT THE AREA OF THE BOTTOM OF THE PRISM IS THE SAME AS THE NUMBER OF CUBES IN A LAYER.

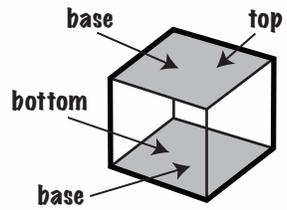

CLASS, WHAT JUANA JUST SAID IS VERY IMPORTANT. YOU WILL USE THIS IDEA AGAIN AND AGAIN TO FIND THE VOLUMES OF SEVERAL DIFFERENT SHAPES.

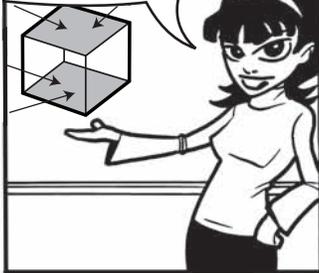

BY THE WAY, CLASS, WHAT JUANA IS CALLING THE BOTTOM IS ALSO CALLED A **BASE** OF THE PRISM.

DON'T FORGET THAT A PRISM HAS TWO FACES THAT ARE **PARALLEL AND CONGRUENT**.

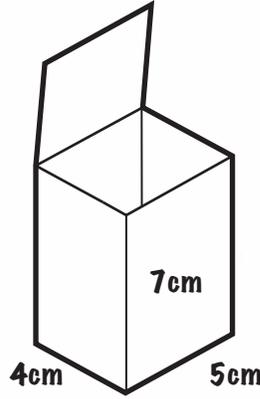

WE CALL THESE SHADED FACES THE BASES OF THE PRISM, BUT YOU MIGHT ALSO THINK OF THEM AS THE **TOP** AND **BOTTOM**.

LET'S LOOK AT A PICTURE OF ANOTHER PRISM AND SEE IF WE CAN FIND ITS VOLUME.

THIS PRISM IS RESTING ON A BASE THAT IS A **4 BY 5** RECTANGLE.

THE HEIGHT OF THE PRISM IS **7** CENTIMETERS.

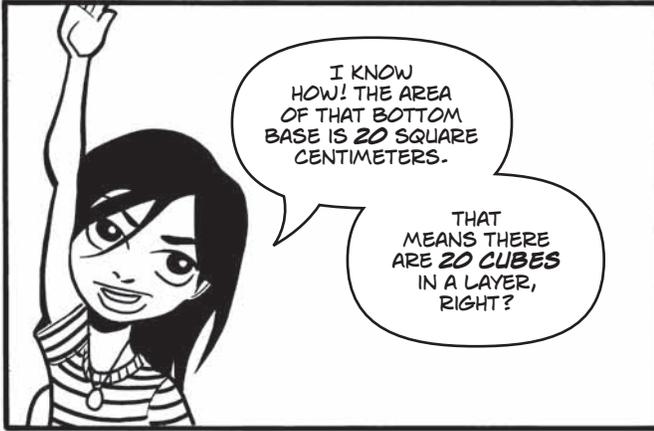

SO, HOW CAN YOU FIND THE VOLUME?

I KNOW HOW! THE AREA OF THAT **BOTTOM** BASE IS **20** SQUARE CENTIMETERS.

THAT MEANS THERE ARE **20** CUBES IN A LAYER, RIGHT?

AND THERE'LL BE **SEVEN** LAYERS BECAUSE THE HEIGHT IS **7** CENTIMETERS.

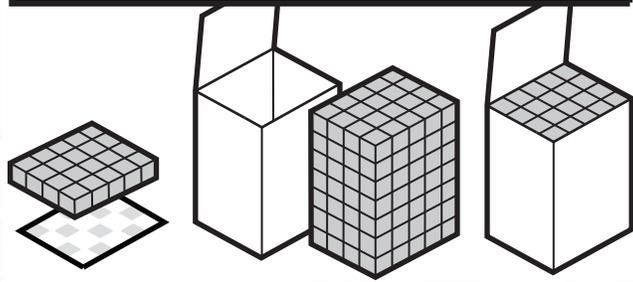

SO, THE VOLUME IS **7** TIMES **20**. THAT'S **140** CENTIMETERS.

MS. CHO, DOES THAT MEAN THAT ALL WE HAVE TO DO TO FIND THE **VOLUME** OF A PRISM IS TO MULTIPLY THE AREA OF THE **BASE** TIMES THE **HEIGHT**?

THAT'S RIGHT. THE **AREA OF THE BASE** TELLS YOU HOW MANY CUBES WILL FIT IN ONE LAYER, AND THE **HEIGHT** TELLS HOW MANY LAYERS IT WILL TAKE TO FILL THE PRISM.

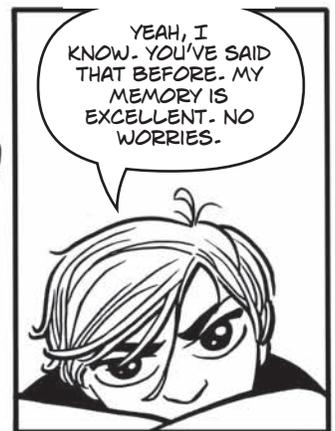

WAIT A MINUTE! ISN'T THAT LIKE A **FORMULA**?

THE BASE IS A RECTANGLE. IT HAS TO BE LENGTH AND WIDTH. THE AREA OF THAT RECTANGLE IS LENGTH TIMES WIDTH, RIGHT? WE'LL USE THE CAPITAL LETTER B FOR THAT AREA. WE'LL USE LOWER CASE LETTER H FOR THE HEIGHT. HERE YOU SEE THE FORMULA.

$V = B \cdot h$

YOU ALL ARE EXACTLY RIGHT ABOUT THIS FORMULA.

I'M GUESSING THAT FROM NOW ON YOU'RE GOING TO PREFER LENGTH TIMES WIDTH TIMES HEIGHT.

$V = B \cdot h$

$V = l \cdot w \cdot h$
